## JOB SAPETY WEEK

- 1. President Eisenhover has designated the week of May 13-19 as Job Safety Week. This has been done to direct the attention of all American people to the appalling number of accidents occurring in the United States, with the hope that they will devise methods of preventing the needless accidents that still happen.
- 2. As the U. S. Coverment's contribution to the success of this week, the Federal Safety Council has voted to call its observance "No-Accident Week".
- 3. I am mindful of the excellent safety record enjoyed by our Agency; it is one of which we can all be proud. I urge that we make every effort to centime this excellent record and not only attempt to evoid any accident during this week, but take attack of our living and working conditions to remove any hemerics which might cause needless scaldents. To this end, each of you should give the matter serious thought and take those stops necessary to prevent the occurrence of any accidents, both at work and at home.
